TECHNICAL SKILLS

AI & Automation

Agentic AI Workflows, Generative AI, Prompt Engineering, AI Automation

Tools & Platforms

Claude, OpenAI, GitHub, Qwen

Programming

PHP, HTML&CSS, SQL

AI-Enhanced Programming

Python, Flutter, Nextjs, Javascript, Typescript

CORE COMPETENCIES

Problem Solving **Communication** **Teamwork** **Adaptability** **TechnicalWriting**

Professional Summary

Final-year Bachelor of Science in Information Technology student and alumnus of the Bayanaihan AI OJT Program. Combines foundational knowledge in full-stack web development with advanced skills in AI-driven automation and workflow optimization. Proficient in leveraging Generative AI and Agentic workflows to accelerate development cycles in Python, Flutter, and modern JavaScript frameworks. Hands-on experience building community-focused solutions, including a Laravel-Inertia-React Barangay Portal capstone project. Eager to apply AI-enhanced technical skills to solve real-world problems and contribute to innovative development teams.

AI Training & Certifications

Bayanaihan AI para sa Bayan On-the-Job Training Program

A comprehensive program focused on practical AI application and workflow automation.

AI Intensive Workshop

• 3-day lecture and hands-on training on Artificial Intelligence foundational concepts and technologies • Real-world use case hackathon with practical MVP application development

Agentic AI Bootcamp

- 5-day lecture and hands-on training on AI Agents and advanced workflow automation concepts
- Practical experience in designing and implementing automated processes using Agentic AI tools

Projects & Experience

Barangay AI APP

Hackathon Project

AI Intensive Workshop

Developed an MVP application designed to automate the extraction of key data from community reports and facilitate quicker decision-making.

Technologies: Qwen, Laravel, Inertia.js, React, MySQL

Role: Developer

Barangay Portal System (Capstone Project)

Bootcamp Project

Academic Requirement | BSIT Program

Developed a centralized digital platform designed to streamline barangay services, constituent records management, and request processing.

Technologies: Laravel, Inertia.js, React, MySQL

Role: Developer

Education

Bachelor of Science in Information Technology

Ilocos Sur Polytechnic State College, Candon, Ilocos Sur
